

# BALTIC SEA CONSERVATION FOUNDATION

*We fund environmental protection  
and nature conservation projects  
that aim to improve the ecological  
situation in the Baltic Sea region.*

## BALTIC SEA CONSERVATION FOUNDATION

Our goal: a diverse, ecologically stable and intact Baltic Sea region as a living-environment for future generations.

The Baltic Sea Conservation Foundation (baltcf) is a private civil law foundation established in 2014 according to German foundation law.

We provide financial support to projects that contribute to nature conservation and environmental protection across the entire Baltic Sea region.

Our funding priorities are:

- Improving the regenerative capacity of the marine environment
- Reducing pollution and eutrophication
- Securing biodiversity and improving habitats for protected species
- Managing marine protected areas
- Securing and developing terrestrial protected areas in the immediate catchment area of the Baltic Sea
- Compensating negative effects in the Baltic Sea's natural environment

## PROJECT FUNDING ACROSS THE BALTIC SEA

We support nature and environmental protection activities and projects.

We are open for cooperation with other donors and can provide co-funding for public and european projects.

### **Would you like to implement your project with our support?**

You are eligible to apply for funds if you are a legal entity (e.g. association or federation) or a public body (e.g. municipalities) located in the Baltic Sea region.

Transparent and objective selection of projects with durable project outcomes are very important to us.

We are therefore seeking to generate measurable results and establish sustainable and viable structures with the allocated funds. Projects are evaluated in two stages. During the first stage, we kindly ask you to submit a project concept form.

If your project concept passes the first assessment stage, you will be invited to deliver a full application.

Our funding criteria, as well as  
further information and all forms  
are available online:
